

The Belle Aire Environmental Club collects several types of hard-to-recycle or non-recyclable materials for the Trash for Cash program. We then sell the collected items to Terra Cycle, a national company which uses these trash items to create new products. Not only do we help keep trash out of landfills this way, but we also get paid 2 cents per item. Last year we made over \$80 with this program.

As part of the Trash for Cash program, we are collecting:

- + **juice pouches** (the metallic type, not the boxes; no straws please)
- + **plastic baggies** (snack, sandwich, quart, or gallon size; **not** grocery bags) and Gladware or Hefty type **plastic food storage containers** (any brand)
- + plastic **rolls and cases from scotch tape and packing tape**
- + crinkly, plastic **diaper, swim diaper and diaper wipe packaging** wrappers

**All items must be clean and empty.**

There are three specially marked Trash for Cash trash cans in the outside trash pen area, which is south west of the main office door. One can is just for juice pouches. A second can is just for plastic baggies and plastic food storage containers. A third can is for both tape rolls and housing and for diaper and diaper wipe packaging.
